

LVIV

Brass Planter

LVIV pots are handmade in Europe. Our production combines the highest standards both in technique and materials. The result is a unique object, suitable for private and public spaces.

The 01, our first model is available up to 2m and the bigger models are specially designed to be handled by forklift. Due to our special light-weight design, LVIV pots are suitable for terraces and indoor decoration. For outdoor use, a stainless steel drainage is applied.
